EXECUTIVE SUMMARY

Engineering Leader with 10+ years of experience in iOS development, including 7+ years in technical leadership and architecture roles. Proven track record leading distributed teams (up to 13 engineers), defining scalable mobile architectures, and building enterprise-grade applications in highly regulated environments.

Strong background in mobile architecture (MVVM-C, modularisation, Clean Architecture), team leadership and mentoring, enterprise mobility & cybersecurity, CI/CD and DevOps automation, and cross-functional collaboration.

Passionate about building high-performing teams, driving engineering excellence, and delivering scalable mobile platforms aligned with business strategy.

CORE COMPETENCIES

- Engineering Leadership & People Management
- iOS Architecture & System Design
- Mobile Strategy & Governance
- Swift, SwiftUI, Combine
- Modular Architecture & Feature Isolation
- REST API Design (API-first approach)
- CI/CD (GitHub Actions, Jenkins, GitLab, Fastlane)
- Enterprise Security (MDM, MAM, Intune, BlackBerry UEM)
- Agile, SAFe, Spotify Model
- BDD / ATDD / Automated Testing
- Cross-platform alignment (iOS / Android collaboration)

PROFESSIONAL EXPERIENCE

Cognizant (Client: Inditex)

iOS Chapter Lead of SPAI (Spain, Portugal And Italy) / Architect

Madrid, Spain | Aug 2023 – Apr 2026

Senior Engineering Leader responsible for iOS capability growth and technical direction.

Leadership & Strategy

Lead and mentor 12 senior mobile engineers across SPAI region.

- Defined growth plans, career paths, and performance objectives.
- Established and scaled the internal iOS community (technical workshops, knowledge sharing, architecture reviews).
- Acted as technical reference point across mobile initiatives.

Technical Leadership

- Led a team of 5 senior iOS engineers delivering a new app from scratch.
- Designed and implemented a modular MVVM-C architecture using SwiftUI and Combine.
- Introduced feature modularisation to improve scalability and maintainability.
- Implemented CI/CD pipelines using GitHub Actions.
- Collaborated in API-first design and REST contract definition.
- Participated in 3 Amigos and Example Mapping sessions to align business and engineering.

Impact

- Improved development velocity through reusable architecture patterns.
- Reduced onboarding time via documentation and structured architecture decisions.

Wiley Edge (Client: HSBC)

iOS Architect / Mobile CoE (SME – Subject Matter Expert)

London, UK | Sept 2021 – Sept 2022

Part of the Enterprise Mobile Centre of Excellence as the iOS Subject Matter Expert (SME).

Architecture & Governance

- Designed enterprise iOS template architecture adopted by multiple teams.
- Implemented modular MVVM-C architecture aligned with Clean Architecture and SOLID principles.
- Created reusable templates to eliminate boilerplate and standardise development.

Produced technical documentation and UML diagrams.

Enterprise Security

- Defined mobile security patterns in collaboration with system architects.
- Worked with Intune, Zimperium, BlackBerry UEM, MDM, and MAM solutions.
- Designed architectural patterns to satisfy different enterprise security contexts.

Cross-Platform Alignment

- Partnered with Android architect to ensure parity in architectural decisions.

Jaguar Land Rover

iOS Technical Leader (Contract)

Gaydon, UK | Jan 2018 – Sept 2021

Led distributed international mobile teams (8–13 engineers across UK, Belarus, India).

People Management

- Managed team capacity, planning, and delivery.
- Created structured onboarding process for new developers.
- Facilitated alignment between product, backend, and mobile teams.

Architecture & Delivery

- Led redevelopment of InControl Remote apps from scratch.
- Owned end-to-end delivery of major features (backend and app integration).
- Designed scalable architecture to support multi-country releases (40+ markets).
- Contributed to technical documentation and system design decisions.

Methodologies

- Worked within SAFe framework.
- Applied Spotify model practices.
- Practiced BDD and ATDD for 3+ years.

Jaguar Land Rover

Senior iOS Developer (Contract)

Gaydon, UK | July 2015 – Jan 2018

- Implemented reactive programming in Swift and Objective-C.
- Built CI/CD pipelines using Jenkins, GitLab, Fastlane.
- Automated unit, BDD, and UI testing.
- Integrated Firebase (analytics, remote config, funnels).
- Implemented WebSockets communication layer.
- Created mock servers and debugging tooling.
- Led backend-mobile integration alignment for new features.

Apps delivered:

- Land Rover InControl Remote
- Jaguar InControl Remote

Earlier Career

Junior Programmer – Sadiel S.A. (Spain)

- Worked with Java, JavaScript, SQL, PL/SQL, ASP.

Coordinating Director – Asociación Imaginática

- Managed 50 members in a university tech association.

CAREER DEVELOPMENT PERIOD

Oct 2022 – July 2023

Intentional sabbatical focused on professional growth and technical expansion including SwiftUI advanced patterns, JavaScript, React Native, Docker, and full-stack fundamentals.

EDUCATION

Master in Computer Engineering – Universidad de Sevilla

Degree in Computer Systems – Universidad de Sevilla

LANGUAGES

Spanish – Native

English – Fluent

Portuguese – Conversational
